Work Experience: Healthcare Services (Oncology Focused)

We have worked across a spectrum of projects with the oncology space, including feasibility study for a breast cancer hospital, market assessment and market entry strategy for a MedTech investment, and performance Improvement project

Feasibility Study for a Breast Cancer Hospital in Delhi NCR

Deloitte helped in feasibility analysis for a breast cancer hospital in Delhi NCR, involving population and cancer incidence assessment, patient flow analysis, competitive landscape review, and a 10-year financial model. It identified success factors like multi-organ cancer focus, global linkages for second opinions, and best practice adoption to ensure viability

Market Assessment & Entry Strategy for Global MedTech Investment in India (ODD on a cancer hospital)

Deloitte provided an overview of oncology landscape in India and undertook assessment of six select markets where the target units existed, and where client had plans to enter, this also included inputs/ commentary on revenue projections of the target hospitals, and discussions on the potential impact of PMJAY on target's revenue

Healthcare Costing and Performance Improvement

Deloitte was engaged to operationalize and operate a Group Negotiation Unit (GNU) to undertake group negotiations for drugs and equipment on behalf of the member hospitals for 15 months; Deloitte also supported implementation of the price discovery cycle for high value medical equipment and negotiated value of ~INR 200 Crore

Note: Above credentials may include Deloitte team members' experience outside Deloitte network

Proposal 1

VPS Lakeshore envisions to develop a tertiary care focused Oncology hospital in Delhi NCR with differentiation to compete in the highly competitive Delhi-NCR market

Market Context

Oncology care in India is undergoing a **structural shift**, driven by rising incidence, earlier diagnosis, and rapid expansion of advanced treatment capabilities across major metros.

Key market dynamics include:

- **Rising cancer burden** driven by aging population, lifestyle changes, and urbanization
- **Improved early diagnosis** supported by wider adoption of advanced imaging, molecular diagnostics, and structured screening programs
- **Shift towards comprehensive, tertiary-led oncology care**, spanning medical, surgical, and radiation oncology
- **Growing demand for specialized cancer centers** offering advanced technologies (e.g., LINACs, precision radiation, targeted therapies)
- **Increasing affordability and access**

Together, these trends are driving sustained demand growth for differentiated oncology hospitals, particularly in large metros with strong referral ecosystems.

Strategic Context

VPS Lakeshore is evaluating entry into the Indian oncology delivery market in Delhi for establishing a flagship, tertiary oncology platform

Key strategic considerations include:

- Oncology being evaluated as a **core strategic platform**
- Opportunity to build a **center-of-excellence-led oncology hospital**, differentiated through clinical outcomes, advanced infrastructure, and patient-centric care delivery
- Focus on defining the **optimal hospital configuration** — size, specialty mix, price positioning, infrastructure (beds, chemotherapy bays, LINACs), and **doctor engagement model** — to ensure commercial viability and sustainable returns

The evaluation is anchored in **assessing market attractiveness, competitive positioning, and financial feasibility**, with the objective of developing a scalable and differentiated oncology platform in India.

Monitor Deloitte.

Integration of two proposals

We propose two engagement structures anchored around a common business plan for VPS Lakeshore (Module D of Proposal 1 and 2), enabling parallel execution within the team and a unified business plan for a hospital delivering integrated oncology and rare-disease services

Phase 1

Proposal for Go-to market strategy for an Oncology Hospital in Delhi

Proposal 1

- Module A
- Module B
- Module C

Phase 1

Proposal for Market Study in the Rare Diseases Area

Proposal 2

- Module A
- Module B
- Module C

Phase 2

Common business plan

Module D of Proposal 1 and 2

(Combined financial plan)

Key Objectives

- A **single center** at the VPS Lakeshore site in the **Qutub Institutional Area**, envisioned as a hub to build Centers of Excellence (CoEs) across both **oncology and select rare-disease areas**, supported by a shared clinical, operating, and infrastructure platform
- **Parallel execution** to support faster decision-making without duplication of effort
- Alignment through a **common business plan**, with rare-disease assessments informing incremental upside and differentiation

Copyright © 2026 Deloitte Touche Tohmatsu India LLP. All rights reserved.

Proposed Scope of work (1/5)

Proposal 1

Detailed framework for preparing the go-to market strategy for an oncology center in Delhi

Framework for preparing a go-to market study for a oncology hospital in Delhi

Phase 1

Module A

- **Engage with key management personnel to understand the company's goals and strategic vision**
  - Articulate the project's key objectives and management's expectations to ensure alignment
  - Key financial and operational parameters of the previously running hospital at the location
  - Identify any boundary conditions, if any, such as infrastructure, finances, human resources

Based on outcomes

Module B

- **Gain insights into the oncology healthcare delivery market by analyzing demand and supply factors, population demographics, key growth drivers, and other relevant aspects**
  - Conduct a market demand-supply analysis (beds, LINACs, chemo beds), evaluating demand growth, affordability, demographics, price positioning, supply availability, competitive landscape, types of offerings (across medical, surgical and radiation oncology), and talent availability
  - Evaluate trends in market, and emerging opportunities in key specialties

Based on outcomes

Module C

- **Deep-dive into the operational and financial metrics of key competitors (oncology focused hospitals and oncology department of multi-specialty hospitals)**
  - Analyze relevant competitors to evaluate industry business models and differentiation strategies, price positioning, occupancy trends, geographical mix, key services and presence across specialties,, room count, and other factors
  - Finalize the broad hospital contour- size, price positioning, specialties, level of care, infrastructure (chemotherapy beds, in-patient beds, LINACs)

Based on outcomes

Phase 2

Module D

- **Detailed business plan for assessing the feasibility of the hospital**
  - Develop a forecast for 5 – 10 years period covering revenue, cost structures, cashflows, ROCE, ROE
  - Evaluate capital investment requirements, breakeven timelines, and return analysis (IRR, NPV, payback period) based on the construction and operation timeline
  - Overlay rare-disease assumptions on volumes, pricing, capex, and operating costs onto the core oncology business plan
  - Risk analysis with scenario planning under varying market conditions

Copyright © 2026 Deloitte Touche Tohmatsu India LLP. All rights reserved.

Proposed Scope of work (2/5)

Proposal 1

Detailed framework for preparing the go-to market strategy for an oncology center in Delhi

Phase 1

Module A — Strategic alignment and objective setting

Scope of Work

- Conduct a **workshop with key personnel of the client** to align on their goals for the oncology segment and establish key boundary conditions
- Understanding the Company's Strategic Vision & Expansion Goals; some of the questions could include
  - **Competitive positioning**: Positioning as a premium vs. affordable vs value focused
  - **Likely USP/Differentiating factors**: Such as services offerings, presence of star doctors, infrastructure (presence of advanced equipment),
- **Boundary conditions**/ management preferences such as area availability, infrastructure, finances, human resources

Key Outcomes

- Define a structured approach for the market feasibility study, ensuring alignment between the company's strategic vision and the execution roadmap

Copyright © 2026 Deloitte Touche Tohmatsu India LLP. All rights reserved.

Proposed Scope of work (3/5)

Proposal 1

Detailed framework for preparing the go-to market strategy for an oncology center in Delhi

Phase 1

Module B — Market landscape for existing oncology players

Scope of Work

- Assess **demand and supply for oncology care**, by understanding:
  - **Demographic and income profile:** income profile of the micro-market, population of the micro-market,
  - **Location attractiveness**: Connectivity with the airport, highway, railway station
  - **Demand for quality beds/LINACs/Chemotherapy beds:** Local hospitalizations, drain ins and medical tourism (if any)
  - **Growth drivers:** Relevant government schemes, growth in industrial activities
  - **Demand of key procedures/surgeries/services** in the micro market (top 3- 5 procedures/services in Oncology)
- Assess **supply of relevant onco beds/ LINACS** by understanding
  - **Estimate quality bed/LINAC/chemotherapy beds** supply among leading corporate players, standalone hospitals, and small hospitals/nursing homes
  - Understand **upcoming/announced quality bed** additions coming for over the next 3-5 years
  - Understand **occupancy** of relevant players among **3-4 leading hospitals**
  - **Price positioning** of relevant 3-4 hospitals in micro-market
  - Juxtapose demand growth with **current supply and supply growth** to arrive at the attractiveness of the market from **demand-supply perspective**

Key Outcomes

- Demand profile of the market – demand for quality beds, geographical mix (from within the micro-market and outside)
- Supply profile of market – supply of quality beds, price positioning, availability of infrastructure and occupancy/utilization of relevant hospitals
- Identifying market supply and demand gaps

Copyright © 2026 Deloitte Touche Tohmatsu India LLP. All rights reserved.

Proposed Scope of work (4/5)

Proposal 1

Detailed framework for preparing the go-to market strategy for an oncology center in Delhi

Phase 1

Module C — Competitor analysis of hospitals (focusing on oncology) in the catchment

Scope of Work

- Performance of top 3-4 oncology focused hospitals (key players to be identified in consultation with client and would be a mix of the oncology focused hospitals and multispecialty hospitals providing oncology services):
  - **Overall revenue and revenue mix by** surgical, medical and radiation
  - **Operating KPIs –** # of beds, LINACs, Chemo beds, occupancy, ARPOB, specialty mix, IPD and OPD volumes per day
  - **Historical volume growth and pricing growth**
  - **Patient mix** (local vs. drainage)
  - **Referral & Patient Acquisition Landscape** (e.g. GP referrals, smaller hospital referrals, digital channel)
  - **Pricing for key procedures/surgeries (4-5 key procedures/surgeries)**
  - **Doctor Engagement model** (full time vs visiting & fixed salary vs minimum guarantee vs variable pay)
  - **Competitive positioning and differentiation**: Value proposition and differentiation strategies of key players
- Based on the above parameters, finalize **broad hospital contours in discussion with VPS lakeshore**

Key Outcomes

- Size and scale of operations of relevant players in the micro-market
- Key operating, financial KPIs, specialty mix, payor mix, EBITDA margin, capex, for oncology focused hospitals
- Broad hospital contour and services offerings for detailed financial analysis/business plan

Copyright © 2026 Deloitte Touche Tohmatsu India LLP. All rights reserved.

Proposed Scope of work (5/5)

Proposal 1

Detailed framework for preparing the go-to market strategy for an oncology center in Delhi

Phase 2

Module D — **Financial model/Business Plan development (to be started post completion of market study for rare diseases)**

Scope of Work

- **Based on inputs from Module C, develop key assumptions underpinning the business plan/financial model for the proposed hospital**
  - Price positioning, patient volumes, service offerings, infrastructure, specialty mix
- **Financial modelling and revenue projections (5-10 years)**
  - **Revenue:** Based on specialty mix (medical, surgical, radiation, others), patient volume, occupancy/utilization rates (%)
  - **Cost structures:** Material costs, Staffing cost, facility maintenance, rent and utilities, admin expenses, marketing and promotional expenses
  - **Capex:** Land and building costs, medical and therapeutic equipment (capex inputs to be provided by the client)
  - **Cashflow:** Operating, financing and investing activities
  - **Balance Sheet:** Projections of short-term and long-term assets and liabilities
- **Investment return analysis:**
  - Assess **viability of the project** by understanding project and equity IRR, NPV and benchmarking against industry for validation
  - Analyze **breakeven period** and **payback timelines** for the project
- **Assess the financial impact of rare-disease services** on hospital economics, including revenue upside, operating margin, and capital expenditure
- **Risk assessment and scenario analysis:**
  - Conduct **sensitivity analysis** on demand fluctuation and cost variables
  - Develop understanding of project outcomes in **best-case, base-case and worst-case** financial scenarios
- **Summarize the return expectations** – IRR, ROCE, NPV, payback period

Key Outcomes

- Business plan with revenue projections, cost structure, cashflow statements, balance sheet
- Projected revenue breakup, specialty mix, payor mix, OPD-IPD mix
- Return matrix including payback period, ROCE, ROE
- Identified financial risks with scenario planning for market fluctuations and strategic decision making

Deloitte's Approach & Methodology

Proposal 1

Approach elements	Particulars	Key areas to probe / analyze
Management discussions	• Discussion with senior management (such as CEO, CFO, strategy head)	• Proposed value proposition, competitive differentiation, and expected service offerings • Historical revenue, operational KPIs, financial performance • GTM, growth strategy, plans, return expectations • Key constraints, CAPEX, location, payback period
Interactions with competing players	• IDI (in-depth interactions) with key management personnels and oncologists from competitor hospitals (3-4 hospitals) • Total of 8-10 conversations which would give insights across sub-specialties	• Key players, key services and offerings, infrastructure offered • Operational and financial KPIs for relevant players • Patient volumes, historical trends, growth trends, upcoming supply • Revenue mix, payor mix, engagement models • Capital expenditure, operating expenses
Secondary research	• Desktop research • Deloitte's internal knowledgebase	• Secondary/desktop research, covering data available in public domain in the form of published reports, news articles, press releases, public sector websites and presentations • Proprietary databases subscribed to by Deloitte, and proprietary non-confidential information residing within the team based on previous experience in the sector

Note - *Expert recruitment is done by third-party vendors. Cost for same would be charged at actuals

Feasibility Study for a Breast Cancer Hospital in Delhi NCR

Feasibility study to identify opportunity to set-up a breast cancer focused hospital along with other cancer modalities in the Delhi-NCR region

Context

- The client, a leading pharmaceutical API manufacturer, along with other businesses in the consumer sector, was looking to establish a cancer hospital, with breast cancer being the main specialty, along with other organ-specific cancer treatments, in the Noida region

Approach

- Outlined the key population base of Delhi-NCR region, incidence, prevalence of cancer, to identify base population with need for cancer treatment in the region
- Conducted assessment of in-flow and out-flow of patients between various Delhi-NCR regions, and other tertiary catchment areas for the proposed hospital site
- Conducted multiple researches around potential treatment availability in the region, competitive landscape assessment and global examples to identify key differentiators for the cancer hospital
- Developed a detailed feasibility model with 10-year forecast and IRRs using assumptions on bed-mix, surgical, medical and radiation oncology, other support procedures, ALOS, utilization of key medical equipment, pricing of key procedures, consumable costs, other operating costs, doctor engagement model, staff to bed ratio, typical capex assumptions etc.

Impact

- Outlined the key risks and requirements to ensure the viability of the business case (e.g., focus on multi-organ cancers, developing 120+ beds and creating global linkages for second opinions, bringing global best practices etc.)

Note: Credential was obtained during previous work stint of Deloitte resource

Building Workforce Capabilities (including Training Programs)

Organization design and manpower planning for a comprehensive cancer care and research center based on best-in-class global benchmarks

Context

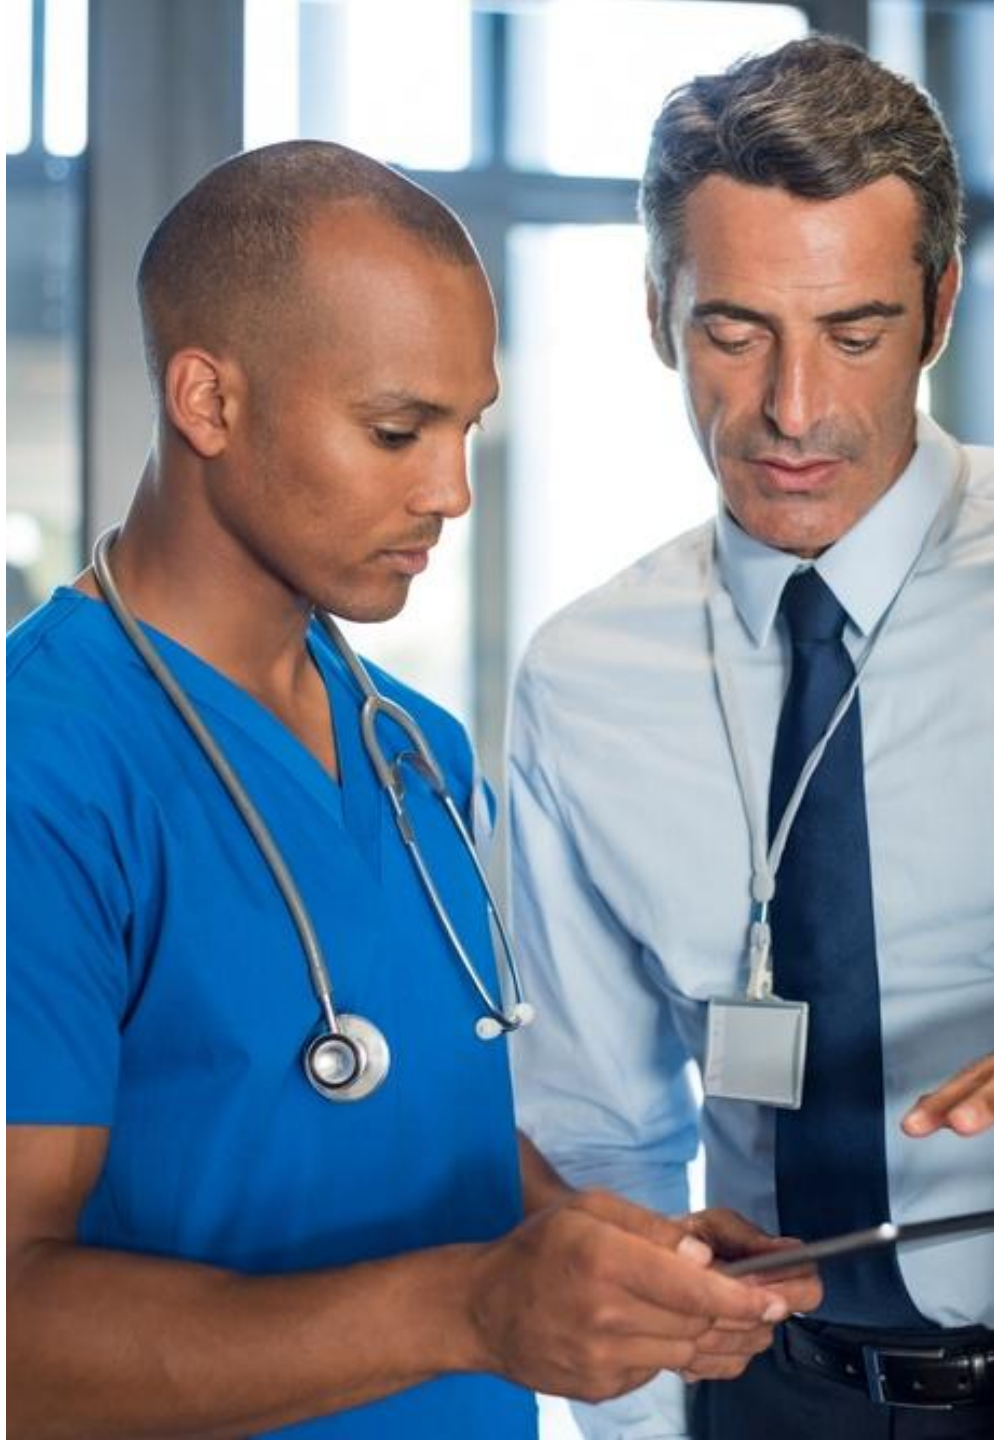
- The client was setting up a comprehensive cancer care research center in Oman as a 9-story campus building. The client wanted to do the following:
  - Finalize an organization design and structure
  - Identify the appropriate operating model (treatment modality vs clinical program based)
  - Develop a manpower plan and write detailed job roles and descriptions

Approach

- Work was delivered across two phases
- Phase 1
  - Conducted stakeholder discussions on vision and aspiration and designed the operating model and organization structure across interim and end-state based off on benchmark organizations
  - Identified department structures (Up to N-3 level) and created job descriptions
- Phase 2
  - Finalized organization structure and detailed out additional job descriptions
  - Developed manpower norms and numbers based off on benchmark research

Impact

- Developed detailed benchmarks of six centers of excellence hospitals in cancer care and research
- Developed the final recommendations that identified the appropriate organization structure , projected manpower requirements and provided detailed descriptions for nearly 25 job roles



Market Assessment & Entry Strategy for Global MedTech Investment in India (ODD on a cancer hospital)

Context

- The client, a global medical technology player, wanted to acquire a leading cancer care hospital chain in India
- As part of their due diligence requirement, the client approached Deloitte to provide an overview of oncology landscape in India and undertake assessment of six select markets where the target units existed, and where client had plans to enter

Approach

- Assessed the overall India oncology care landscape including demand, cost of care, key players and key trends etc. Conducted primary research in six cities and secondary research for:
- Demand assessment: Studied the catchment area, patients segments and flow to estimate overall demand for oncology care including key trends
- Supply assessment: Studied the overall oncology care supply including size of the market, clinical infrastructure, types of services available etc. at the city level. Also provided details on key trends (current and upcoming), key doctor movement etc.
- Competition benchmarking: Studied key cancer care competitors in each market, and benchmarked the targets on various input parameters (location, clinical infrastructure and clinical program) and output parameters (Volume/ utilization, pricing, positioning, referral network perception)

Impact

- Created market assessment report with overview of India oncology market, local market assessment and competition benchmarking
- Provided inputs/ commentary on revenue projections of the target hospitals, and discussed the potential impact of PMJAY on target's revenue

Healthcare Costing and Performance Improvement

Set-up of National Cancer Grid of India

Context

- The National Cancer Grid of India (NCG) engaged Deloitte to operationalize and operate a Group Negotiation Unit (GNU) to undertake group negotiations for drugs and equipment on behalf of the member hospitals for 15 months

Approach

- Conducted feasibility analysis and developed business case for setting up of a price discovery cell
- Developed an end-state vision, a price discovery framework, as well as vendor evaluation framework to be used by the price discovery cell
- Set-up governance structures for the GNU along with operational frameworks
- Designed a roadmap for sustainability pillars of PDC : e-procurement platform, governance and operating team
- Helped shortlist vendors and over-saw purchase-to-pay cycle to ensure sustainability of GNU operations

Impact

- Supported implementation of the price discovery cycle for high value medical equipment and negotiated value of ~INR 200 Crore
- Supported the client in delivery of various bid/tendering documents and processes as well as standard operating procedures to run the price discovery cell

OUR CREDENTIALS

Market and Program Impact Assessments

Operational due diligence and assessment of a comprehensive cancer care hospital as part of acquisition by a leading medical technology player

Context

- The client, a global medical technology player, wanted to acquire a leading cancer care hospital chain in India
- As part of their due diligence requirement, the client approached Deloitte to provide an overview of oncology landscape in India and undertake assessment of six select markets where the target units existed, and where client had plans to enter

Approach

- Assessed India's oncology care landscape, including demand, cost, key players, and trends
- Conducted primary research in six cities and secondary research on:
    - Demand: Estimated oncology care demand by analyzing catchment areas, patient segments, and flow
    - Supply: Evaluated market size, clinical infrastructure, and available services at the city level, highlighting key trends and doctor movements
    - Competition: Benchmarked competitors based on location, clinical infrastructure, programs, volume/utilization, pricing, positioning, and referral network perception

Impact

- Created market assessment report with overview of India oncology market, local market assessment and competition benchmarking
- Provided inputs/ commentary on revenue projections of the target hospitals, and discussed the potential impact of PMJAY on target's revenue
